DECORATIVE GLASS

Textured Mirror Collection

At ADG, we know that great design is about more than just aesthetics, it's about creating spaces that inspire and endure.

That's why our textured glass collection made using exclusive decorative finishes is crafted to bring beauty, sustainability, and innovation to the market. Whether you're an architect, interior designer, custom home-builder or flat glass professional, our moisture-resistant mirror paint and nature-inspired textures offer stylish, practical solutions that will enhance any space. From luxury renovations to new builds, our grout-free glass surfaces and ceramic frit printed enclosures create seamless designs that balance privacy, light, and durability, even in humid environments.

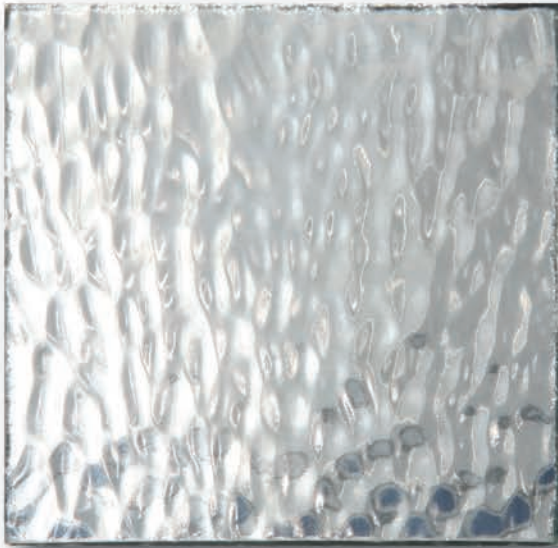

As smart materials reshape the industry, ADG is standing-by to help bring your vision to life with beautiful products made possible by cutting-edge technology.

Let's collaborate and create something truly remarkable together with glass!

Printed Textured Glass

As shown, printing can be done on the smooth side facing out on Surface 1. Then the background is diffused by the textured glass as Surface 2, providing a level of privacy and visual diffusion that you cannot get with clear glass. This opens up a world of possible applications, especially for beautiful shower enclosures.

Painted Textured Glass

As shown, textured side is facing out, Surface 1. Then the color is painted onto smooth side which is Surface 2. This creates a beautiful textured glass panel that reacts perfectly with ambient light as it reflects off the surface creating a lot of movement and sparkle.

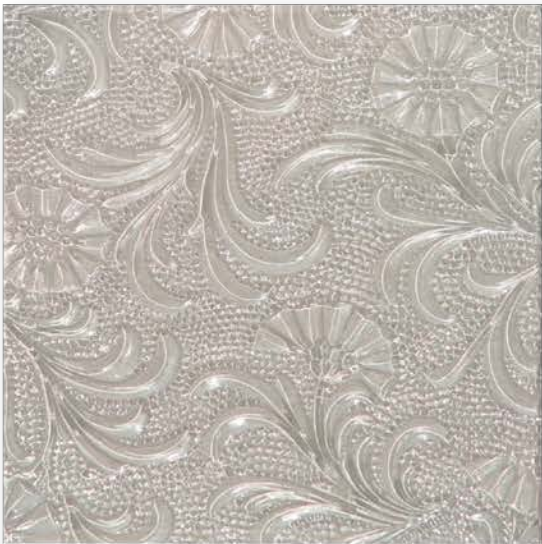

When used in shower applications all glass is finished with EnduroShield coating for ease of maintenance.
