

Ceramic Frit Printed Glass

Model N°. 0006

Product Description

Direct-to-glass printing transforms glass into a canvas for precision artwork and high-resolution designs. Using ceramic frit ink that fuses during tempering, this process ensures unmatched durability for both interior and exterior applications. Unlike traditional silk-screening, it allows for fine lines, typography, photo-realistic image reproduction, artwork adaptations, and seamless tiled patterns with flawless alignment. Unlock limitless design possibilities with a permanent, high-quality solution that elevates any space. As shown here with 100% Opacity Surface 2.

Applications

- Shower Walls
- Accent Walls
- Wainscoting
- Facade Wall Cladding
- Table Tops
- Furniture
- Art Installations
- Signage
- Backlit Murals and more....

Innovative Features & Benefits

- Low-Iron glass
- High resolution up to 720 dpi
- Varying levels of opacity within the print
- UV fade and scratch resistant
- Custom Color Matching
- Custom Pattern Design

Technical Specification

ADG ceramic frit printed glass meets or exceeds ANSI Z971., CAN/CGSB, AND CPSC 16 CFR 1201 safety glazing test requirements.

Special Care & Handling

If glass is to be stored prior to installation it is important it be kept in a vertical position that is a cool, dry and well ventilated area. Do not let moisture accumulate between sheets, especially if touching, if detected, separate sheets & dry immediately.
